Often taken as agent-noun from TINK *v.*[1], in reference to the noise made in hammering metal: cf. *Promp. Parv.* *c* 1440, and Johnson 'because in their work they make a tinkling noise'. This explanation is not in itself very plausible, and its support by the Sc. form *tinkler*, as an assumed parallel derivative of *tinkle*, is overthrown by the fact that *tinkle* vb. was app. not in Sc. use. Moreover Sc. *tinkler* and Eng. *tynkere* appear as trade names or surnames in 1175 and 1265 respectively, and in many instances before 1300, long before any trace of *tink* or *tinkle* has been found.]

1. A craftsman (usually itinerant) who mends pots, kettles, and other metal household utensils.

The low repute in which these, esp. the itinerant sort, were held in former times is shown by the expressions *to swear like a tinker, a tinker's curse* or *damn, as drunk* or *as quarrelsome as a tinker*, etc., and the use of 'tinker' as synonymous with 'vagrant', 'gipsy' (see b).

b. In Scotland and north of Ireland, the ordinary name for a gipsy: see TINKLER [1]. Also, applied to itinerant beggars, traders, and performers generally; † a vagabond, tramp, or reputed thief (*obs.*).

The chief ostensible business of travelling gipsies in Scotland used to be the sale or mending of pots, pans, kettles, and metal-ware generally; hence *tinkers*, or rather *tinklers*, was their ordinary designation.

d. *Not to care, or be worth, a tinker's curse* or *damn*, an intensification of the earlier 'not to care, or be worth, a curse or damn' (see CURSE *sb.* 2 †, DAMN *sb.* 2), with reference to the reputed addiction of tinkers to profane swearing: see 1. Cf. also quot. 1884, in which 'not to care a straw' is similarly intensified. (An ingenious but baseless conjecture suggesting another origin appears in quot. 1877.)

**Tinker** (ti·ŋkəɹ), *v.* [f. prec. sb.]

In all senses usually depreciative.

1. *intr.* To work as a tinker; to mend metal utensils (and hence *gen.* any material objects), esp. in a clumsy, bungling, or imperfect way.

1592-1887 [see TINKERING *vbl. sb.* and *ppl. a.*].

b. *fig.* To work at something (immaterial) clumsily or imperfectly, esp. in the way of attempted repair or improvement; also more vaguely, to occupy oneself about something in a trifling or aimless way; to trifle, potter. Const. *at*, *with*.

1658 GURNALL *Chr. in Arm.* verse 14. xiii. 1682 *Bells of Oxford* in *Wit & Drollery* 302 Tincle, tincle, goeth the little Bell, To call the Students home. 1899 JEFFERIES *Wild Life in S. Co.* 260 There comes the tinkle-tinkle of a bell. 1888 DOUGHTY *Arabia Deserta* I. 149 They make, as the daughters of Jerusalem, a tinkle-tinkle as they go.

**Tinkle** (ti·ŋkˈl), *v.*[1] Forms: 4 tynckle(n, 4-6 tynkle, 5 -kel, -kyll, 6 -ckle, tinkel, 6-7 tincle, 6-8 tinckle, 6- tinkle. [*Tinkle* has the form of a frequentative of TINK *v.* (see -LE 3), which also suits the chronology. In some MSS. of the later Wyclif version, it takes the place of the earlier *tink*, as said of a cymbal; and it is frequent from 1450 of the sound of bells, etc.

In both Wyclif versions *pincle* is also used of the 'ringing' and 'tingling' of the ears; but in some MSS. of the later version *tingle* is substituted. In the 16th c. *tinckle* is said even of the nose. Here it might be thought to represent OE. *tinčian* 'to tickle', L. *titillare*, if there were any trace of that vb. in ME. But it is to be remembered that L. *tinnire*, which Wyclif rendered *tynke* and *tyncle*, was used of the ringing both of metals and of the ears, and even in the sense 'tingle'. In mod. use, *tinkle* may be said of the ears in the sense 'ring', implying sound objective or subjective, but the thrilling nervous sensation is expressed by *tingle*; 'my ears tingle', like 'my hands tingle'; see TINGLE *v.* Cf. WFlem. *tinkelen*, to tingle (as the fingers with the cold), also said of the sound of a drop falling into water.]

I. 1. *intr.* Of the ears: To ring, to tingle: = TINGLE *v.* 1 (now *rare*). † Of the nose or other parts: = TINGLE *v.* 2, TICKLE *v.* 2 (*obs.*).

**Tinsel** (tinsĕl, -sĕl), *sb.*[3] and *a.* Forms: *a.* 6- tinsel; also 6 tynsel(le, -sil(l, -syll, tincel, tincle, tensell, 6-7 tyn-, tinsell, -sill, 7-8 -sil. *β.* 6 tylsent, tilsent. *γ.* 6 tynsyn, tensyn, -sen, tinsin, 7 tynsin. See also TINSEY. [The etymology, though certain in its main fact, presents difficulties of detail, owing chiefly to the want of early OF. examples. Evidently *tincel*, *tinsel*, arose out of OF. *estincelle*, mod.F. *étincelle* 'a sparke or sparkle of fire, a flash', Cotgr. (=pop.L. **stincilla* for *scintilla* spark), and OF. *estincelé*, mod.F. *étincelé* 'sparkled, sparked, also powdered or set with sparkles', pa. pple. of OF. *estinceler* 'to sparke, to sparkle as fire; to twinkle as a starre or Dyamond; to set thicke with sparkles' (=pop.L. **stincillāre* for *scintillāre* to sparkle, glitter). In 14-15th c. Fr., the *s* of *es-* had long been mute, and the pronunciation was actually as in mod.Fr. *étincelle*, *-elé*; of this the initial *e* disappeared (app. in Anglo-F. or Eng.) by aphesis, giving *tincel(le*. Our earliest examples show the word used attrib. or as adj. in *tinselle satin*, app. representing a Fr. *satin étincelé* (with *-e* mute in Eng., as in some other words), or else the Eng. 'tinselled satin' (see TINSELLED) with *d* lost between *l* and *s*. Thence sense 2, *tinsel* alone = *tinsel satin*, *tinsel cloth*, etc. Sense 3, which is later, may represent the Fr. sb. *étincelle*. *Tilsent* and *tinsin*, early popular perversions, scarcely survived the 16th c.; they also were at first attrib. in *tylsent satin*, *tynsyn satten*.]

1855 J. R. LEIFCHILD *Cornwall Mines* 200 There is no regularity in these tin-streams, as they are of different breadths, though seldom less than a fathom. 1891 *Labour Commission* Gloss., *A tin streamn* (not stream) deals either with alluvial deposits or with the refuse of the mines .. and separates what is valuable .. by washing processes.

So **Tin-streamer,** one who obtains tin from a deposit of sand or gravel by washing; **Tin-streaming,** the washing of tin from such a deposit.

1839 DE LA BECHE *Rep. Geol. Cornw.* etc. xiii. 405 Whole ground, as the tin-streamers term the stanniferous gravel and superincumbent beds which have not been previously disturbed by the old men. *Ibid.* xv. 545 Tin-streaming seems to have been conducted in Pryce's time much as it is at present. 1881 H. L. DRAKE in *Athenæum* 1 Oct. 432/3 Tin-streaming was a wealthy and influential industry, that enriched landlords, tenants, and 'bounders', who .. set Acts at defiance. 1899 BARING-GOULD *Bk. of West* II. 83 This rubble has been turned over and over by tin-streamers.

**Tint** (tint), *sb.*[1] [app. altered from the earlier TINCT, which may already have been so pronounced; but It. *tinta* tint, hue, may have influenced the technical use in painting.]

1. A colour, hue, usually slight or delicate; a tinge; *esp.* one of the several lighter or deeper shades or varieties, or degrees of intensity, of the same colour: see quots. 1848–79 in sense 2.

1727 POPE *Epist. to Mr. Jervas* 5 Whether thy hand strike out some free design, .. Or blend in beauteous tint the colour'd mass. 1754 GRAY *Pleasure* 42 Chastised by sabler tints of woe. 1798 WORDSW. *Thorn* v, Ah me! what lovely tints are there Of silver green and scarlet bright. 1834 MRS. 2. *spec.* a. *Painting*: see quots. *Middle tint, prime tint*: see MIDDLE *a.* 6, PRIME *a.* 9 a.

1753 HOGARTH *Anal. Beauty* xiii. 179 Light and shades .. become, as it were, our materials, of which 'prime tints' are the principal. By these I mean the fixed and permanent colours of each object, as the green of trees, &c. 1784 J. BARRY in *Lect. Paint.* v. (1848) 183 The middle tint, or intermediate passage between the two masses of light and dark. 1848 WORNUM *Ibid.* 211 *note*, Although there are but three primitive colours, painters have sine. These are yellow, red, blue, .. orange, purple, green, .. russet, olive, citrine. .. All other gradations of colour are mere tints of the above; dark or light, according as they are mixed with black or white, or according to the proportions in which they are compounded. Thus the variety of tints is infinite. 1859 GULLICK & TIMES *Paint.* 8 *note*, Tints differ from each other in being simply lighter or darker, but hues differ in colour. *Ibid.*, In ordinary usage, however, by 'tints' we frequently mean colours generally, and the word is often substituted for 'hues'. 1879 POLE in *Nature* 6 Nov. 15/2 *note*, In technical language mixtures of a colour with white are called *tints*, with black, *shades*.

b. *Engraving.* The effect produced by a series of fine parallel lines more or less closely drawn so as to produce an even and uniform shading.

*Crossed tint*, one produced by lines crossing at right angles. *Ruled tint*, one produced by a single series of parallel lines. *Safety tint*, that used on bills of exchange, cheques, etc., either as a ground of the whole surface, or specially on the parts which have to be completed in writing, as a security against alterations.

1880 *Prim. Trades Jrnl.* xxxi. 6 Worked in black, and light tints, on a stone coloured paper.

3. *attrib.* and *Comb.*, as *tint work*; **tint-block,** a block of wood or metal hatched with fine parallel lines suitable for printing tints; **tint-drawing,** drawing in diluted shades of various colours, or in one colour so that the gradations are produced by washes of pigment; **tint-tool,** an implement used for hatching or graving a tint-block.

1869 *Eng. Mech.* 10 Dec. 298/3 Tint-tools. 1873 E. SPON *Workshop Receipts* Ser. I. 147/1 The parallel lines forming an even and uniform tint, as in the representation of a clear sky, are obtained by what is called the tint-tool. 1884 *St. James' Gaz.* 24 Oct. 7/1 Mr. Linton .. draws an emphatic distinction between wood-cutting .. and wood-engraving, or white-line tint-work. 1897 *Daily News* 23 Apr. 6/5 He .. is seen to most advantage in tint works, such as the View over Romney Marsh.

**Tint,** *sb.*[2] *dial.* [Origin uncertain: perh. two different words.

In sense 1 *tint* may be a variant of *tent* dial., lit. 'trial', f. L. *tentare* to try. It is also possible that *tint* in sense 2, quot. 1886, has the same origin (quasi 'not a taste, not a trace'); but it is very doubtful whether this origin can be assumed for quot. *a* 1225.]

**-tion,** a compound suffix, representing, often through Fr. *-tion*, OF. *-cion*, ME. *-cio(n)*, L. *-tio, -tiōn-em*, consisting of *-io, -ion-em* added to the *-t* of a L. participial stem, as in *rela-t-ion, comple-t-ion, frui-t-ion, muni-t-ion, protec-t-ion, deten-t-ion, op-t-ion*: see -ation and -ion. Rarer forms are *-sion, -xion*, as *suspen-s-ion, infle-x-ion.* The etymological meaning was primarily 'the state or condition of being (what the pa. pple. imports)', e. g. the condition of being *related, completed, protected, detained, suspended, inflected*, etc. But already in L. *-tio* was used for the action or process of *relating, completing, suspending*, etc., and also concretely or quasi-concretely, as in *dictio*, the condition of being said, the saying of something, a saying, a word; so *nātio* birth, a brood, a nation; *ōrātio* mode of speaking, an oration. In Eng. the most usual sense is that of a noun of action, equivalent to the native ending -ing[1], and having also the kindred uses mentioned under that suffix.

**-tious,** compound suffix, repr. L. *-tiōsus*, consisting of *-iōsus*, -ious, appended to the *-t* of a L. participial stem. It thus serves to form adjectives belonging to sbs. in *-tion*, as in *ostentation, -tious, ambition, -tious, caution, -tious, contention, -tious, nutrition, -tious, superstition, -tious*; but its range is much narrower than that of *-ion.*

**Tip** (tip), *sb.*[1] Forms: 5–6 **typpe, typ,** 6–7 **tippe,** 7 **tipp**; 6– **tip.** [In 15th c. *typ, typpe*, the former = MLG., MDu., LG., Du., EFris. *tip*, MHG. *zipf*; Da., Norw. *tip*, Sw. *tipp*, all = 'point, extreme end, very top'. Not known in OE., ON., OS., or OHG.; but perhaps cognate with *tip(p)en*, Tip *v.*[1], though the connexion of sense is not clear. The modern cognate langs. have in the same sense a derivative form :—**tippul*, MDu., Du., MLG., LG. *tippel*, MHG., Ger. *zipfel.*

(So far as is known, *tip* has no etymological connexion with *top*; but the proximity of form and relative quality of sound in the two words have caused *tip* to be felt as denoting a thinner or more delicate *top*; cf. *drip, drop, chip, chop*, also Tip-top.)]

**1.** The slender extremity or top of a thing; *esp.* the pointed or rounded end of anything long and slender; the top, summit, apex, very end.

[*Note.* The normal and regular repr. of OE. *tæppet* down to 1600 was Tapet; and phonetic development of *t* out of *a* would be abnormal; the rare ME. *tepet* and *tippet* are prob. from *tipet.* The ordinary meaning of the OE. and ME. word, and of the OHG., was 'carpet', as in Latin, but in *Ælfric's Vocabulary, tæppet* occurs under the heading *Vestimenta Mulierum*, as if a name of a garment. Yet the gloss *Sipka* an healfhriuh tæppet', seems to come from the same source as one in the 15th c. *Nominale*, under the heading *De Lectis et Ornamentis eorum*,' Hec amphicapa est tapeta et uiridis parti uilosa. Hec sipha iteum est' (Wr.-W. 744/5), where the *sipha* or *tapeta* is evidently a bedcover; so that the Ælfric entry is prob. placed under the wrong heading. A change of meaning from 'carpet' or 'bedcover' to the senses above, is very improbable. Derivation of *tippet* from *tip* is favoured by the fact that Ger. *zipfel*, orig. diminutive of *zipf* 'tip', has the senses 'tip, point, end, lappet, tail', etc.]

But the agent-nom Tippler occurs as an established and app. legal term in 1396, and frequently in the 15th c.; so that either the verb must have existed before 1400, though not yet in evidence, or *tippler* must have originated otherwise, and *tipple* have arisen from it as a back-formation: cf. Peddar, Peddle *v.*

The ulterior history is uncertain; *tipple* or *tippler* cannot, from the date, be a freq. deriv. of Tip *v.*[2] in any sense; nor is it easy to connect it with LG. and Du. *tipper* 'tip, extreme point' (Tip *sb.*[1]). But according to Assen, Norw. dial. *tipla* 'to drip slowly', which Falk and Torp derive from *tippa* to project, to drip, from *tip* 'point', has also the sense 'to drink in small quantities', 'tipple', evidently related to the Eng. word, though the mode of relationship is not clear. An ultimate connexion with Tap *sb.*[1], *v.*[1] has also been thought possible, but connecting links are wanting.]

**Tire** (tāiə), *sb.*[2] Forms: 5, 7, 9 tyre, (8-9 tier), 7- tire. See also TYRE. [Probably the same word as prec., the *tire* being originally (sense 1) the 'attire', 'clothing', or 'accoutrement' of the wheel. From 15th to 17th c. spelt (like prec.) *tire* and *tyre* indifferently. Before 1700 *tyre* became generally obsolete, and *tire* remained as the regular form, as it still does in America; but in Great Britain *tyre* has been recently revived as the popular term for the rubber rim of bicycle, tricycle, carriage, or motor-car wheels, and is sometimes used for the steel tires of locomotive wheels.]

†1. *collective sing.* The curved pieces of iron plate, called strakes or streaks, placed end to end or overlapping, with which cart and carriage wheels were formerly shod (now rarely used, and only for heavy agricultural vehicles, artillery carriages, etc.).

1488 in *Ripon Ch. Acts* (Surtees) 32, I tyre pro rota plaustri. 1601 HOLLAND *Pliny* xxxiv. xiv. [*Note.* Thomson's patent (quot. 1845 above) is known as the foundation of the pneumatic tire or tyre (2 b), and was largely cited in the great actions for infringement during the 'tyre boom'. T. did not actually use the expression 'elastic tire' or 'tyre', but spoke of an 'elastic band' around the (iron) tire. This 'band' was however exactly what is now termed a 'pneumatic tyre'—a distended inner tube with an outer cover or jacket. (H. V. Hopwood, Dep. Librarian, Patent Office Lib.)]

b. An endless cushion of rubber, solid, hollow, or tubular, fitted (usually in combination with an inner tube filled with compressed air: cf. PNEUMATIC 1 b) on the rim of a bicycle, tricycle, or motor-car; now also often upon the wheels of invalid and baby-carriages, and light horse vehicles. In this sense now commonly spelt *tyre* in Great Britain (see TYRE); *tire* is retained in America.

1877 KNIGHT *Dict. Mech.* III. 2579 At the same time Mr. Dunlop patented a tire of annealed cast-iron, grooved to receive an india-rubber band. **II. 3.** *intr.* To make a rattling noise by turning or moving something rapidly to and fro or up and down. **a.** In the phr. *to tirl at* († *upon*) *the pin*, to make such a noise on some part of the gate or door, in order to gain admittance; also *to tirl at the latch*, *at the sneck*.

An old phrase of ballad poetry, which in the 19th c. was taken up and used by Scott, and others after him. Now generally identified by antiquaries with the use of the appendage called the *tirling-pin* (see *sb.*[2]), formerly used for this purpose. (Cf. TINKLE *v.*[1] 3, *Bob Novice* ix, 'When he came to Lord Barnet's castel He tinklet at the ring'.) But in this identification there are difficulties; a *rip* is not a 'pin', nor has it any resemblance to a 'pin', in any known sense of the word; the *pin* of a door was the latch or handle which was 'lifted' or 'turned' to open the door: see quots. under PIN *sb.*[1] 1 b; whereas the 'rip' was a fixed appendage which could neither be lifted nor turned, having no connection with the latch or door-handle. Hence it would seem that 'to tirl at the pin' was to make a noise by moving the latch up and down rapidly. It is possible that the 'rip and ring' was a later device, which came to be erroneously considered as the apparatus by which the 'tirling at the pin' was performed.

Connexion has been suggested with L. *titivillitium* used once by Plautus, and inferred to mean 'a mere trifle, a bagatelle'.

But in some of the earliest continental instances of the name, it is written *Titiuillus*, or *Tutiuillus*, and in many it is impossible to say whether the middle consonant is *n* or *u* (*v*). At an early date English usage settled on *u* (later *v* and *f*). Titivillus was evidently in origin a creation of mediæval wit. Not in its English form the name passed from the Mystery Plays into popular speech as a term of the vernacular, still in use after 1600.]

1. Name for a devil said to collect fragments of words dropped, skipped, or mumbled in the recitation of divine service, and to carry them to hell, to be registered against the offender; hence, a name for a demon or devil in the mystery plays. Also found in France and Germany, 13–15th c.

What generally passes as the earliest mention of the name and function of Titivillus or Tutiuillus, occurs in a Latin sermon (Wackernagel *Gesch. der Deut. Lit.* II. 466, note) conjecturally attributed to the Dominican Petrus de Palude, a native of Burgundy and student of Paris, who became Patriarch of Jerusalem, and died in 1342. A very similar and app. equally early account is printed in T. Wright's *Latin Stories* (Percy Soc. 1842), from a Brit. Mus. MS. (Arundel 506, ff. 46) of German origin, of first half of 14th c. Both these stories cite the verse, so often quoted by later writers, 'Fragmina psalmorum Tutiuillus colligit horum', the former adding 'Quaque die mille vicibus sarcinat ille' (Every day he fills his bag a thousand times). Tutiuillus is also mentioned, 1382–85, by Gower *Vox Clamantis* v. 854; and in the 15th c., esp. c 1450, references become frequent. The earliest Eng. form is app. Lydgate's *Tytyuylly*, or *Tytyuyll*, c 1420 (sense 2).

As *apex* was used by the Latin grammarians for the accent or mark over a long vowel, *titulus* and *apex* became to some extent synonymous; hence Wyclif's use of *titil*, *titel*, to render L. *apex*.]

1. A small stroke or point in writing or printing.
**a.** Orig. rendering L. *apex* 'point, tip', applied in classical L. to any minute point or part of a letter, also to the mark over a long vowel, as *ā*, later also to a line indicating an abbreviation. More recently applied also to the Spanish *tilde* or circumflex over *ñ*, formerly to the cedilla under *ç*. By extension, any stroke or tick with a pen.
The literal notion of a point of a letter passed over to that of the smallest point of that which was written or prescribed. This took place already in late Heb. with the word שׂרף *qōts*, lit. 'thorn, prick', represented in Greek by κεραία 'horn, projecting point', and in L. by *apex*, in Wyclif transl. *titil*: see the quots.

Gothic used only the form *du*, and ON. substituted *til*, TILL. In prehistoric OE. the prep. was already levelled with the adv. in

the form *to* (*tê*, *tô*), as in Ger. both are now *zu*. But while *tô* adv., retaining its stress, came at last to be written *too* (tû), the prep., being usually stressless, remained as *to* (*tê*, tü, tə), and in dialectal specimens is now often written *ta*, *tae*, *teh*, *ti*, *tu* (meaning tâ, tê, tə), some of which forms are occasional also in earlier writing. (In some northern dialects (tê) develops before a vowel into *tez*, *tes*.)

**A.** *prep.* (in ordinary use, before a sb.)

The OE. prep. *tō* normally 'governed' or was followed by the dative case, sometimes, idiomatically, by the genitive or the instrumental (esp. in *tō þæs* and *tō þȳ*), rarely by the accusative. In later Middle and modEng., *to* is followed by the ordinary 'objective' case, which in sbs. is formally identical with the nominative, and in pronouns is the dative-accusative, *me*, *him*, etc. In Middle and modEng. *to* not only represents the OE. preposition, but also takes the place of the OE. inflected dative case. Even in OE. the simple dative was often reinforced by *tō*, or (what came to the same thing) was supplanted by *tō* and its case. This was very frequent in late OE., and (helped no doubt by the example of French, which had similarly substituted the construction with *à* (L. *ad*) for the L. dative) became universal in ME., the simple dative remaining only in pronouns and substantives as the indirect or remoter object, known by its position before the direct object (as in 'give me the book', 'tell John the news'). Both with pronouns and sbs., the prepositional construction may, and in some cases must, be used (e.g. 'give the book to me', 'tell it to John'). In OE. many verbs 'governed' or took a dative object; with the loss of the dative inflexion, this case could no longer be distinguished from the accusative, and verbs are now treated as ordinary transitive vbs. governing the objective (e.g. sio heord folgað ðæmæ wordum ðe ðæm hæmæ ðæs hirdes, 'the herd follows the words and the thews [customs] of the shepherd').

The senses and uses of *to* may be arranged in various ways, every way having its peculiar difficulties owing to cross-currents of history and usage. OE. and the West Germanic Languages had two prepositions with the sense of modern *to*, viz. *tō* and *æt*; the second of these always expressed motion reaching to object; it is therefore probable that *tō* had originally the sense of 'direction towards', without any implication of reaching; and in a truly historical account of the word, it would perh. be necessary to start with the two main divisions of 'toward' and 'actually to'. But even in the earliest written OE. this distinction had, so far as concerns *tō*, faded away, and in the various transferred and later senses it could not be successfully carried out. Even the later distinction between *to* as a preposition implying motion, and *to* without the inflexion, can, from the falling together of these notions, only be partially exhibited. The arrangement here followed is thus largely tentative and practical, and not in every case historical.

This use of *to* in *tódæg*, etc., has been explained as originating in sense 6, through phrases like *nu gyt to dæg* 'now still to this day', shortened to *to dæg*; but it is doubtful whether this covers the whole ground. The mod. s.w. use of *to* with expressions of time seems parallel to its use with place in 4.

**B.** To before an infinitive (or gerund: see 22).

*History*:—Beside the simple infinitive, or verbal substantive in *-an* (ME. *-en*, *-e*), OE., like the other WGer. languages, had a *dative* form of the same or a closely-related sb., which in OE. ended in *-anne*, *-enne*, in ME. reduced successively to *-ene*, *-en*, *-e*, and was thus at length levelled with the simple infinitive, and with it reduced to the uninflected verb-stem. This dative form was always preceded or 'governed' by the preposition *tō* 'to'. By many German writers it is called the 'gerund', after the Latin verbal sb. in *-ndum*. In mod.Eng. the functions of the Latin gerund are more properly discharged by the vbl. sb. in *-ing*, and it is therefore more convenient to speak of the OE. form in *-anne* as the 'dative infinitive' or 'infinitive with *to*'. Originally, *to* before the dative infinitive had the same meaning and use as before ordinary substantives, i. e. it expressed motion, direction, inclination, purpose, etc., toward the act or condition expressed by the infinitive; as in 'he came *to help* (i. e. to the help of) his friends', 'he went *to stay* there', 'he prepared *to depart* (i. e. for departure)', 'it tends *to melt*', 'he proceeded *to speak*', 'looking *to receive* something'. But in process of time this obvious sense of the prep. became weakened and generalized, so that *tō* became at last the ordinary link expressing any prepositional relation in which an infinitive stands to a preceding verb, adjective, or substantive. Sometimes the relation was so vague as scarcely to differ from that between atransitive verb and its object. This was esp. so when the vb. was construed both transitively and intransitively. There were several verbs in OE. in this position, such as *ongiननan* to begin, *onðrēdan* to dread, *beðēodan* to bid, order, *bewerian* to forbid, prevent, *gelēfan* to believe, *þencean* to think, etc.; these are found construed either with the simple (accusative) infinitive, or with *tō* and the dative infinitive. There was also a special idiomatic use (sense 13 a) of the infinitive with *tō* as an indirect nominative, where logically the simple infinitive might be expected. From these beginnings, the use of the infinitive with *to* in place of the simple infinitive, helped by the phonetic decay and loss of the inflexions and the need of some mark to distinguish the infinitive from other parts of the verb and from the cognate sb., increased rapidly during the late OE. and early ME. period, with the result that in mod.Eng. the infinitive with *to* is the ordinary form, the simple infinitive surviving only in particular connexions, where it is very intimately connected with the preceding verb (see below). To a certain extent, therefore, i.e. when the infinitive is the subject or direct object, *to* has lost all its meaning, and become a mere 'sign' or prefix of the infinitive. But after an intrans. vb., or the passive voice, *to* is still the preposition. In appearance, there is no difference between the infinitive in 'he proceeds *to speak*' and 'he chooses *to speak*'; but in the latter *to speak* is the equivalent of *speaking* or *speech*, and in the former of *to speaking* or *to speech*. In form, *to speak* is the descendant of OE. *tō specanne*; in sense, it is partly the representative of this and largely of OE. *specan*.

(The simple infinitive, without *to*, remains: 1. after the auxiliaries of tense, mood, periphrasis, *shall*, *will*; *may*, *can*; *do*; and the quasi-auxiliaries, *must*, (and sometimes) *need*, *dare*: 2. after some vbs. of causing, etc.: *make*, *bid*, *let*, *have*, in sense 15 a; 3. after some vbs. of perception, *see*, *hear*, *feel*, and some tenses of *know*, *observe*, *notice*, *perceive*, etc., in sense b; 4. after *had better*, *rather*, *better*, *sooner*, *as lief*, *as soon*, *as good*, *as well*, etc.: see HAVE v. 22, RATHER *adv.* 9 d, and the other words.)

The infinitive with *to* may be dependent on an adj., a sb., or a vb., or it may stand independently. To an adj. it stands in adverbial relation: *ready to fight* = ready for fighting; to a sb. it stands in adjectival or sometimes adverbial relation: *a day to remember* = a memorable day; to a vb. it may stand in adverbial or substantival relation: *to proceed to work* = to proceed to working; *to like to work* = to like working.

**I.** With infinitive in adverbial relation.

**Indicating purpose or intention.*

**1. a.** Dependent on a vb., *to* with inf. = *in order to*; equivalent to *that* or *in order that* with subjunctive, or to *for* or *for the purpose of* with gerund.

III. With infinitive in substantival relation.

Equivalent to a noun or gerund: *to* being ultimately reduced to a mere 'sign' of the infinitive without any meaning of its own.

13. *a.* with inf. as subject, or as object with complement, introduced by *it* or an impersonal verb; in quot. *c* 1205 † without *it*.

Here the inf. app. originally depended on the adj. or sb. in the *it* clause (as in quots. 1297 *a*, 1400 on the impersonal *hit*), and was therefore put in the form with *to*. Thus *hwilune ðu leohtan scylda bioð beteran to forlætenne*, 'sometimes the slight sins are better to let alone' (K. Ælf. *Pa. C.* 457) might also be expressed *hwilum hit is ðe leohtan scylda to forlætenne* (cf. *hit is god godne to herianne*, quot. *c* 890) 'sometimes it is better to let alone the slight sins'; and this easily passed into the later 'to let alone the slight sins is sometimes better', where the inf. clause becomes the subject as in b.

*c* 888 K. Ælfred *Boeth.* xviii, Nan þara þinga wyrcan þe hin bioðen is to wyrcenne. *Ibid.* xxxviii. § 5 þæt men sie ælfremd fon ðisse worlde. *c* 890 tr. *Beda's Hist.* Pref. 14. with inf. as direct object of a transitive verb. (See also Give v. 29 c.)

OE. normally had the simple inf., like mod.German:

*Beowulf* 356 Þa andswarede..ðe me se goda agifan þenceð. [Cf. *c* 890 tr. *Beda's Hist.* iv. xxiii. [xxii.] (1890) 330 Monige men þa ðe þus þing gehyrdon seoggan.] *c* 893 K. b. merely as object of another preposition, instead of the vbl. sb. or gerund. (Prob. imitating French use.)

For inf. with *about to, for to*, see About A. 10–12, *For prep.* 11.

1485 Caxton *Paris & V.* (1868) 32 Yvenne salewed parys wythoute to make [Fr. *sans faire*] ony semblaunce of loue. 1591 Spenser *Ruines of Time* 499 For not to have been dipt in Lethe lake, Could save the sonne of Thetis from to die. 1611 A. IV. With infinitive equivalent to a finite verb or clause.

15. With inf. as complement to a sb. or pron., forming a compound object or sb. phrase, corresponding to the 'accusative and infinitive' construction in Latin and Greek.

(But certain vbs. in *a.* and *b.* are followed (at least in the active voice) by the simple inf. without a sb. or pronoun made him come'; 'I felt something move'. See *History* above.)

a. after verbs of commanding, teaching, desiring, causing, allowing, or the like; equivalent to a *that*-clause with the sb. or pron. governing a vb. in the subjunctive. Also after the passive of such verbs, the sb. or pron. then becoming the subject.

(Also in early OE. often with simple inf.: e.g. *c* 893 K. Ælfred *Oros.* iv. x. § 11 þa het he ænne mon stigan on þone mest, & locian.)

*c* 888 K. Ælfred *Boeth.* Prayer (1899) 149 Tæc me þinne willan to wyrcenne. *c* 890 tr. *Beda's Hist.* v. xx. [xxii.] (1890) 472 Bana þæing ðe he oðre lærde to donne. *c* 1000 *Ags. Man* II. 7 In doubt to act, or rest, doubt to A. AUSTIN *Eng. Darling* I. 1, To know the worst is the one way whereby to better it.

**b.** In absolute or independent construction after an interrogative, forming an elliptical question.

This may be explained as an ellipsis of the principal clause (sense 16), or of 'is one', 'am I', etc. before the inf. (sense 11 b or c).

1713 ADDISON *Cato* III. vii, But how to gain admission? for Access is giv'n to none but Juba, and her Brothers. 1821 SHELLEY *Hellas* 569 Whither to fly? 1823 J. H. ELLIS *Catullus* lxv. 9 Ah! no more to address thee, or hear thy kindly replying, Brother!..Ne'er to behold thee again!

**†18.** With inf. immediately following the subject, in vivid narrative, equivalent to a past tense indic.; almost always with *go* and vbs. of like meaning.

With ellipsis of *goes* (see Gw v.[1] 1), *took*, or the like; but cf. the 'historic infinitive' in Latin.

*c* 1205 LAY. 21655 Ah Arður com sone mid selere strengðe, And Scottes to fleonne feor of þan zerde. *a* 1300 *E. E. (1587) 34, I to fuge and away hither as fast as I could. 1668 PEPYS *Diary* 28 Sept., I..away home,..and there to read again and sup with Gibson.

**V.** Peculiar constructions.

**†19.** *To* was formerly often used with the second of two infinitives when the first was without it, esp. after an auxiliary, with words intervening between the infinitives. (See also note s. v. THAN *conj.* 1.)

*c* 1205 LAY. 1220 Swa he gon slomnen & þer zefter to slepen. *c* 1440 *Ipomydon* 1246 Bettyr is on huntynge goone, ..Than thus lyghtly to lese a sisone. *c* 1485 *Rec. **To-.** *prefix* 2. *Obs.* exc. in rare *arch.* or *dial.* use. [OE. *to-*, ME. *to-* (*te-*) = OFris. *ti-*, *te-* (*to-*), OS. *ti-* (*te-*), OHG. *zi-*, *za-*, *ze-* and *zir-*, *zar-* (MHG. *ze-*, *zer-*, *zir-*, Ger. *zer-*) :—WGer. **ti-* :—OTeut. **tiz-* = L. *dis-*, a particle expressing separation, 'asunder, apart, in pieces'.

The WGer. *ti-* (= L. *dis-*) in prehistoric times ran together in form with *ti* the un-stressed prepositional form of *ti* (see To *prep.*), with which it had no etymological connexion (being indeed almost opposite in sense); and when the latter was levelled in vowel with its stressed adverbial form *tō*, *tī* (= *dis-*) also followed it, and appears constantly in OE. as *to-*. In most grammars and dictionaries this is written *tō-*, like the stressed form of To *adv.* and *prep.* But as it was the *unstressed* form with which the prefix was formally confounded, and as it was itself always stressless (being sometimes written *te* as in OS. and OFris.), it seems more in accordance with the facts to spell it in OE. *to-* with short *o*, which is therefore done here.

In OE., about 12 such compound verbs in *to-* are recorded; many of these did not survive in ME., where however so many new compounds appear (some formed even on vbs. from French) that their number in Early ME. was not less than in OE. In the 15th c. they rapidly disappeared and only a few are found after 1500. Many of the verbs which took the prefix *to-* had themselves the sense of separation or division; such were *break*, *burst*, *deal*, *melt*, *scatter*, *strew*, *tear*, etc.; in these *to-* added little but force to the notion: cf. *burst*, *burst asunder*, *tear*, *tear asunder*, etc. This led to the prefixing of *to-* to verbs which had no sense of partition, merely as a strengthening or emphasizing particle, as in *darken*, *to-darken*, *swink*, *to-swink*, etc. From an early time *to-*verbs were often strengthened by the qualifying adv. *all* (All C) in sense 'wholly, completely, altogether'; in later times the sense became universal. Consequently, the prefix began to be viewed as *all-to-* or *allto-*; and (verbal prefixes being very commonly written separate from the vb.) *all to* or *all-to* began to be treated as itself an adverb with the sense 'altogether, completely': see All C. 14, 15. Thus in the Bible of 1611, Judges ix. 53 'and all to brake his scull' was etymologically and historically *all to-brake*, i. e. 'all to-pieces-broke', but may have been understood as *all-to brake*, i. e. 'altogether' or 'completely broke'; Fairfax in 1674 by *all-to-be-deckt* can only have meant *all-to bedecht*, 'completely bedecked'.]

1. With separative force: Asunder, apart, to or in pieces; also, away, about, abroad, here and there. Combined with verbs and derived adjs. and sbs. 1775 J. Berridge *Wks.* (1864) 387 To hear one toad compliment another, and speak very handsome things of his toadship. 1885 C. F. Holder *Marvels Animc. Life* 89 Several lessons of this kind evidently made his toadship put on his thinking cap.

**Toadstone**[1] (tōʊ·dstōʊn). [f. Toad *sb.* + Stone.] A name (rendering Gr. and L. *batrachitēs*, or med. L. *bufonites*, *crapaudinus*, F. *crapaudine* (13th c.): cf. Ger. *krötenstein*), formerly applied to various stones or stone-like objects, likened to a toad in colour or shape, or supposed to be produced by a toad; often credited with alexipharmic or therapeutic virtues, and worn as jewels or amulets, or set in rings. These, though of various origin, were all considered to be forms or species of the same 'stone', the most valued kind of which was fabled to be found in the head of the toad, a belief to which many allusions occur in literature: cf. Toad *sb.* 1 *b*, quot. 1600.

1558 *Gifts to Q. Eliz.* in Nichols *Progr.* II. 539 A lewell containing a Crapon or Toade stone set in golde. 1600 B. Zool.* III. 15 It was distinguished by the name of the Reptile, and called the Toad-Stone, Bufonites, Crapaudine, Krottenstein; but all its fancied powers vanished on the discovery of its being nothing but the fossil tooth of the sea-wolf. 1812 Scott *Lett. to Joanna Baillie* 4 Apr. in *Lockhart*, A toadstone—a celebrated amulet...It was sovereign for protecting new-born children and their mothers from the power of the fairies, and has been repeatedly borrowed from my mother, on account of this virtue. 1890 *Murray's Handbk. E. Counties* 291 At the feet [of an image of the Virgin] was a toadstone, indicating her victory over all evil and uncleanness.

*attrib.* 1855 tr. *Labarte's Arts Mid. Ages* xxvi, Toad-stone ring. 1897 W. Jones *Fingers-ring* 156 A toadstone ring (the fossil palatal tooth of a species of Ray) was supposed to protect new-born children and their mothers from the power of the fairies.

**Toadstone**[2] (tōʊ·dstōʊn). *local.* [Of uncertain origin; thought by some to be so named from the resemblance of its amygdaloidal spots to those on a toad's skin; by others to be a corruption of a Ger. *todtes gestein* 'dead rock', reduced perh. to **todt-stein*. But there appears to be no evidence of this, other than the fact that some Derbyshire mining terms appear to be of German origin.] A name given by the Derbyshire lead-miners to an igneous rock, occurring as irregular sheets of contemporaneous lava, interstratified with, or in connexion with the metalliferous mountain limestone.

1784 Darwin in *Phil. Trans.* LXXV. 5 The vast beds of toad-stone or lava in many parts of this country. 1796 Kirwan *Elem. **†Toa·stree.** *Obs. rare.* [First element obscure; second element TREE.] A name used by Markham and Surflet for the main swingletree of a plough, to the end of which are attached the two smaller swingletrees or whipple-trees, to which the two horses or oxen are harnessed.

In the *Eng. Husbandman* Markham appears to use the term as equivalent to swingletree, calling the main swingletree 'the first' or 'hindmost toastree'.

1613 MARKHAM *Eng. Husbandman* I. i. v. Civ b, Presenteth the plough-cleuise, which being joyned to the plough-beame, extendeth, with a chaine, vnto the first Toastree...The hind-most Toastree..is, a broad piece of Ash-woode..which..hath the Swingletrees fastned vnto it.. [Altered from Sp. *tabaco,* according to Oviedo, the name in the Carib of Hayti of the Y-shaped tube or pipe through which the Indians inhaled the smoke; but according to Las Casas, 1552, applied to a roll of dried leaves which was kindled at the end and used by the Indians like a rude cigar. Even before Oviedo's date the name had been taken by the Spaniards as that of the herb or its leaf, in which sense it passed from Sp. into the other European langs.: Pg. *tabaco,* It. †*tabaco* (1578), *tabacco* (Florio, 1598), F. *tabac,* whence Du., Ger., Boh. *tabak,* Du. 1535 OVIEDO *Hystoria de las Indias* (1851) I. 131 A aquel tal instrumento con que toman el humo, o a las cañuelas que es dicho, llaman los Indios Tabaco: e no a la yerva, o suerio que les toma (como pensavan algunos).—IV. 96 En lengua desta isla de Haiti o Española se dice tabaco.

But Dr. A. Ernst of Caracas, in *Amer. Anthropologist* 1889, p. 135, cribes Oviedo's account, citing from the Guarani Vocabolario of Almeida Nogueira (Rio Janeiro, 1879) *taboca* as the extant Guarani name for such a tube as that described by Oviedo, and used for inhaling through the nostrils not smoke but stimulating powders. He gives some reasons for holding that a Guarani tribe using this may have occupied the northern extremity of Hayti; and suggests that Oviedo, writing 43 years after the event, may have confused the use of this instrument with that of the tubular roll of leaves mentioned by Las Casas as *tabacos.*

The island of *Tobago,* after which the herb has been said by some to be named, according to '*Tobago, a Geogr. Description*' etc. (c 1750) p. 74, received the name from its resemblance in shape to the Indian pipe; but other accounts have been given: see quot. 1577 in sense 2.]

**Toby** (tōʷ-bi), *sb.*[1] [The familiar form of the Christian name Tobias, employed in various unconnected senses. (But some of the senses here grouped may have a different origin.)]

1. The posteriors, the buttocks: esp. in phrase *to tickle one's toby.* *slang.*
1681 [see TICKLE *v.* 6 b]. 1842 BARHAM *Ingol. Leg.* Ser. II. *Sir Rupert, Lay Christian.* Throw my cousin John Doe and Richard Roe, And sweetly we'll tickle their tobies.

2. (With capital T.) A jug or mug (formerly common) in the form of a stout old man wearing a long and full-skirted coat and a three-cornered hat (18th c. costume). Also called *Toby Fill-pot, Toss-pot.* Also *attrib.* as *Toby (Fill-pot) jug.*
1840 DICKENS *Barn. Rudge* iv, 'Put Toby this way, my dear'. This Toby was the brown jug of which previous mention has been made. *Ibid.* xxxv, When he had dined, comforted himself with a pipe, an extra Toby, a nap. 1852 SEWELL *Exper. Life* xix. (1858) 131 The great earthenware cup, the figure of a stout little man, which usually went by the name of Toby. 1857 HUGHES *Tom Brown* I. 1, Pouring out his old ale from a Toby Philpot jug. 1901 *Pall Mall G.* 31 Aug. 3 (Cass. Supp.) The brown Toby jug was filled for him. 1908 *Daily Chron.* 3 Nov. 5/6 The Tobies are relics of the old coaching days.

3. The name of the trained dog introduced (in the first half of the 19th c.) into the Punch and Judy show, which wears a frill round its neck: hence *Toby collar, frill*, a turn-down pleated or goffered collar worn by women and children.
1840 DICKENS *Old C. Shop* xviii, Producing a little terrier ..'He was once a Toby of yours, wasn't he?' 1885 *Pall Mall G.* 30 Apr. 6/2 A trailing dress with the Toby frill so favoured by these reformers. 1909 *19th Century* Mar. 446 A young gentleman in so-called skeleton trousers and a Toby frill. 1909 *Daily Chron.* 30 Aug. 7/5 A turn-down Toby collar of frilled lawn.

4. A colour-printing machine for textiles.
1876 *Encycl. Brit.* IV. 684/2 By means of a modern invention several colours may be applied at once on the cloth by means of one block. The machine used for this purpose, which is called a 'toby', consists of [etc.].

5. An inferior kind of cigar. *U. S. slang.*
1896 *Columbus* (*Ohio*) *Dispatch* 18 July 15/3 A large supply of..tobies. 1903 *Westm. Gaz.* 23 May 10/1 The railway ticket office clerk twists and swigs at a 'toby' as he asks you 'Where for, sir?'

**Toby** (tōʷ-bi), *sb.*[2] *Thieves' slang.* [app. altered (? through *tobá*, *toba*) from *tobar*, the word for 'road' in Shelta, the cant or secret language of the Irish tinkers: see Note below.] *The toby*: the highway as the resort of robbers; 'the road'; also *transf.* highway robbery (called also *the toby concern, toby lay*); hence *to play* or *ride the toby*, to practise highway robbery; *the high* (or *main*) *toby*, highway robbery by a mounted thief; also, the highway itself; *the low toby*, robbery by footpads.
1811 *Lex. Balatr., Toby Lay*, the highway. 1812 J. H. VAUX *Flash Dict.* s.v., The toby applies exclusively to robbing on horseback: the practice of footpad robbery being properly called the *low toby*, it is common to distinguish the former by the title of *high-toby*, and the latter of *low-toby*. 1824 SCOTT *St. Ronan's* XXXI, Armed, as if he meant to bing folks on the low toby. 1904 *Athenæum* 4 May 648/1 Travellers..looked askance at its long, empty reaches, haunted maybe by gentlemen of the high toby. [1890 J. SAMPSON in *Trnl. Gypsy Lore Soc.* II. 217 *Tober* or *Toby*. This old word has found acceptance in every branch of cant..: *Toba*, ground, is given as stroller-players' cant in the 'Sporting Chronicle'. Borrow in his 'Lavo-Lil' calls Tobbar 'a Rapparee word'.]

Hence **Toby** *v.*, *trans.* to rob on the highway; **To·byman**, a highwayman.
So *toby-gill, high toby gloak, high toby spice* (also *high spice toby*): see quots.
1811 *Lex. Balatr.* s.v. *Toby, High toby man*, a highwayman. *Low toby man*, a footpad. *c* 1812 in Byron *Juan* XI. xix. *note*, On the high toby-spice flash the muzzle, In spite of each gallows old scout. 1812 J. H. VAUX *Flash Dict.* s. v., To *toby* a man, is to rob him on the highway, a person convicted of this offence, is said to be *done* for a *toby*. *Ibid., Toby-gill* or *Toby-gloak*, properly signifies a highwayman. *Ibid., High-toby-gloak*, a highwayman. 1824 H. AINSWORTH *Rookwood* III. v, Jack Hall, a celebrated toby-man. 1876 HINDLEY *Adv. Cheap Jack* 4 Halting..during the heat on the 'high spice toby', as we used to call the main road. 1881 *Daily News* 22 Dec. 1/3 When the footpad and 'high-tobymen' of ancient turnpike roads are replaced by male and female brigands armed with pistol and chloroform. 1902 *Illustr. Lond. News* 20 Dec. 951/3, I am a-looking anxiously for a tobyman that has wickedly robbed a lady.

[*Note.* For Shelta see J. Sampson in *Jrnl. Gypsy Lore Soc.* 1890, II. 217, also Konn Meyer, *ibid.* 257. This latter holds Shelta or 'Sheldhru' to be 'a deliberate and systematic modification' of Irish Gaelic, of considerable antiquity, the words being altered by reversal, metathesis, substitution and addition of letters or elements. Hence *tobar* has been viewed as formed by metathesis from Irish *bothar* 'road'; though, if so, it must either have been formed from the *written* word, or be very ancient, since medial *th* has long been mute.]

**Tod** (tɒd), *sb.*[2] [Known in sense 1 from 15th c.; app. the same word as mod. Ed'ris. (= LG. dial.) *todde* 'bundle, pack, small load (of hay, straw, turf, etc.)': see Doornkaat-Koolman; also in dial. (Groningen, Guelderland, Overyssel) *tod* load. With this cf. Sw. dial. *todd*[1] a conglomerated mass, esp. of wool' (Björkman). Answering in form also (though not very satisfactory in sense) is MHG., Ger. *zotte* 'tuft of hair, matted or shaggy hair', also 'rag', mod.Du. *tod*, *todde* 'rag'. (The ON. *toddi* does not mean 'tod of wool' as erroneously stated in Vigf., but only 'bit, piece'.

An original sense of 'conglomerated mass', passing on the one hand into 'load', and on the other into 'bushy mass, bush', would perhaps suit the various senses. Sense 1 may have come to England in connexion with the wool trade with the continent; sense 2, on the other hand, which is a century later, seems to approach the sense 'tuft' or 'tufted mass'.]

**Tofet**, variant of TOVET, measure of two pecks.

**Toff** (tɒf). *vulgar.* Also *rarely* toft. [Perh. a vulgar perversion of TUFT, as formerly applied to a nobleman or gentleman-commoner at Oxford.] An appellation given by the lower classes to a person who is stylishly dressed or who has a smart appearance; a swell; hence, one of the well-to-do, a 'nob'.

1861 MAYHEW *Lond. Labour* I. 217/2. *Ibid.* (1864) II. 502/1 If it's a lady and gentleman, then we cries, 'A toff and a doll!' 1865 *Slang Dict.*, *Toft*, a showy individual, a swell. 1883 *Fortn. Rev.* Dec. 852 The poets who are here are tremendous proud toffs. 1900 Upward *Eben. Lobb* 130 'Nonsense, man,..why, in these days a jockey is no end of a toff. 1901 *Essex Weekly News* 29 Mar. 2/1 She..declared that tramps were treated like toffs at Stanway Workhouse.

b. Sometimes applied in compliment to a person who behaves 'handsomely'; a 'brick'.

1898 *Brit. Weekly* 27 Jan. 306/1 A Paisley bailie let off a man easier than the culprit expected, and was addressed, 'Thank you, sir, you're an old toff'. This was meant for a compliment. 1906 *Daily Chron.* 25 May 4/7 One of the witnesses..spoke of a generous employer as 'a regular toff'. 'Toff' is perhaps the highest compliment, or the bitterest sneer, according to the tone, that a man who does not make any pretence to magnificence can aim at a man who does.

Hence **To-fish**, **To-ffy** *adjs.*, like or characteristic of a 'toff', stylish.

1898 *Westm. Gaz.* 13 Jan. 4/2 He wore a 'toffish' side pocket jacket, which fitted him like a glove. 1901 J. K. JEROME *Obs. Henry* 31 Toffy enough she looked in her diamonds and furs.

**Toffee, toffy** (tɒ·fi). [Of uncertain origin: app. orig. dialectal, and sometimes spelt *tuffy*, *toughy*, as if named from its toughness; but the earlier form is the northern TAFFY, q. v.] A sweetmeat made from sugar or treacle, butter, and sometimes a little flour, boiled together; often mixed with bruised nuts, as *almond* or *walnut toffee*.

*a* 1825 FORBY *Voc. E. Anglia*, *Toughy*, a coarse sweetmeat, composed of brown sugar and treacle; named from its toughness, though perhaps it should be spelled *tuffy*, and considered as another form of taffy, described in Wilbraham's *Cheshire Dialect* (1817) as compounded of the same ingredients. 1829 MRS. CARBONE *Scotch Gossip* in *Houlston Tracts* I. No. 22. 2 Some shining sticky stuff, which in some countries children call tuffy. 1828 *Craven Gloss.* s.v., 'To join for toffy', to club for making toffy, a custom still very frequent among young persons. 1862 DICKENS *Lett.* 28 Jan., I am going to bring the boys some toffee. 1877 BLACK *Green Past.* ii, Is it sixpence you want to buy toffy with?

b. *attrib.* and *Comb.*

1857 HUGHES *Tom Brown* I. iii, It being only a step to the toffy shop. 1896 *Westm. Gaz.* 30 May 2/1 The effect.. that a toffee drop has on a churchwarden when he finds it in the bag.

**Toggle** (tɒ'gl), *sb.* Also 8–9 toggel. [Said to be orig. in nautical use; of obscure etymology, but app. closely related to Tuggle *v.*, to catch, hold fast, entangle, and to Taggle *v.*, Taigle *v.*, and their nasalized form Tangle. The use of a toggle was originally to catch or hold fast a rope or chain and prevent its slipping.]

1. *Naut.* A short pin passed through a loop or the eye of a rope, or a link of a chain, or through a bolt, to keep it in place, or for the attachment of another line.

1769–76 Falconer *Dict. Marine, Toggel, cabillot,* a small wooden pin, about five or six inches in length, and usually tapering from the middle towards the extremities. It is used to fix transversely in the lower part of a tackle, in which it serves as an hook whereby to attach the tackle to a strop, slings, or any body whereon the effort of the tackle is to be employed. There are also toggels of another kind, employed to fasten the top-gallant sheets to the spar, which is knotted round the cap at the top-mast-head. 1775 Ash, 1828 Webster, Toggel. 1829 Marryat *F. Mildmay* viii, The yard-ropes were fixed to the halter by a toggle in the running noose of the latter. 1854 Hooker *Himal. Jrnls.* I. ix. 218 Tethered by halters and toggles to a long rope. 1898 F. 2. *transf.* a. A cross-piece attached to the end of a line or chain (e. g. a watch-chain), or fixed in a belt or strap for attaching a weapon, etc. by a loop or ring; also, a cross-piece put through a loop to effect compression by twisting. **b.** A device for fixing an anchor: see quot. 1831. **c.** A movable pivoted cross-piece serving as a barb in a harpoon. **d.** *Mech.* A toggle-joint. **e.** *dial.* Each of the two short handles or 'nibs' of a scythe.

1831 J. Holland *Manuf. Metal* I. vi. 100 In 1821, R. F. Hawkins, a Kentish mariner, obtained a patent for an anchor, the arm and flukes of which turned round in eyeholes at the termination of the shank, until they formed therewith an angle of about sixty degrees, in which position they were detained by a thick piece of iron, called by the inventor a 'toggle'. When this anchor is let go, one of the ends of the toggle comes in contact with the ground, and puts both flukes in a position to enter; and when the strain comes on the cable, the other end of the toggle...sets the anchor in its holding position, not with one fluke only, as in the common anchor, but with both. 1872 E. Spon *Workshop Receipts* Ser. I. 310/2 This straightens the toggles, and causes a sharp impression of the stamp upon the leather. 1875 Bedford *Sailor's Pocket Bk.* x. **Tolu-,** the prec. word as a formative element in chemical terms (first in Ger. *toluin,* Berzelius 1842, whence in Eng. *toluol* 1845, *toluene* 1871).
**To·luate,** a salt of toluic acid, as tolnate of calcium, $C_{16}H_{14}Ca''O_4$. **Toluene** (tōʷlūə,ĭn) [so named because obtained by Deville 1841, by the dry distillation of tolu balsam], $C_7H_8$ = Benzylic hydride, $C_7H_7.H$, a colourless very mobile strongly refracting liquid, with a smell like benzene and a burning taste; discovered by Pelletier and Walter, 1837; the source of many compounds and substitution products, into the names of which it enters, e. g. *chlorotoluene, methyltoluene, toluenesulphuric,* etc.; hence **Tolue·nic** *a.*, as *toluenic sulphydrate.* **Toluic** (tōʷlūə·ĭk) *a.* [*tolu*(*ene* + -ic], in *toluic* or *toluylic acid,* $C_8H_8O_2$, an aromatic acid, homologous with benzoic acid, prepared from toluene, cymene, or xylene; so *toluic aldehyde,* $C_8H_7OH$, *toluic chloride,* $C_8H_7OCl$, *toluic ether,* etc. **To·luides,** compounds homologous with the anilides, derived from toluidine salts by abstraction of water, e. g. *aceto-toluide.* **Tolu·idine,** also called *amidotoluene,* and formerly *toluylia,* $C_7H_7(NH_2)$, a crystalline base, produced by the action of sulphydric acid on nitrotoluene, solidifying in snow-white crystals, which gradually turn brown on contact with the air; it is the source of numerous compounds, e. g. *acetotoluidine, phenyltoluidine,* etc. **To·luol,** earlier name of *toluene.* **Toluo·xyl,** $C_8H_7O$, the radical of toluic acid and its derivatives. **Tolu·xic** *a.* (In), in *toluric acid,* $C_{10}H_{11}NO_3$, also called *toluglycic acid,* homologous with hippuric acid, produced in the passage of toluic acid through the animal body; its salts are **Tolu·xates.** **Toluyl** (tōʷ·lu,il) [-yl], the radical, $C_8H_7$; hence **Toluy·lic** *a.*, of or belonging to toluyl, as *toluylic alcohol,* $C_8H_7OH$, etc.

1. The axe of the North American Indians, used as a weapon of war and the chase, and also as a tool and agricultural implement; in English use the word is usually applied to it as the war-axe.

It consists of a wooden shaft about 2½ feet long, with a head originally formed of a long hard stone shortened at one end, or of a piece of copper, or of the horn of a deer, but after the advent of white traders usually of iron (*trade tomahawk*). Sometimes the shaft was hollow, and a bowl was fashioned at the back of the head (*pipe-tomahawk*).

**Tom cat, tom-cat** (tɒ·mkæ·t). [See TOM *sb.* 6.

In 1760 was published an anonymous work 'The Life and Adventures of a Cat', which became very popular. The hero, a male or 'ram' cat, bore the name of Tom, and is commonly mentioned as 'Tom the Cat', as 'Tybert the Catte' is in Caxton's Reynard the Fox. Thus Tom became a favourite allusive name for a male cat (see quot. 1791 s.v. TOM *sb.* 6); and people said 'this cat is a Tom' or a 'Tom cat'.]

In ME. this was commonly spelt, as in French, *tonne*; in 16–17th c., more often *tun*; from *c* 1688 the two spellings have been differentiated, *tun* being appropriated to the sense 'cask' and the liquid measure, and *ton* to the senses here treated, which, it will be seen, are partly measures, and partly weights.]

†**1.** A large wine-vessel, a cask; hence, a measure of capacity used for wine: now spelt TUN, q. v.

**2.** A unit used in measuring the carrying capacity or burden of a ship, the amount of cargo, freight, etc. Originally, the space occupied by a tun cask of wine (see explanatory quot. 1894 on *ton light*: s. v. TIGHT *a.* 14, and quot. 1539 here). Now, for the purposes of registered tonnage, the space of 100 cubic feet. For purposes of freight, usually the space of 40 cubic feet, unless that bulk would weigh more than 20 cwt., in which case freight is charged by weight. But the expression 'ton of cargo' is also used with regard to special packages which are conventionally assumed as going so many packages to the ton. Cf. also TONNAGE.

[It. *tondo* 'a round, circle, compass; also a round trencher, plate, or little dish' (Florio); in mod.It. a studio term used in relation to paintings, Della Robbia ware, and other fine art work; shortened from *rotondo* round.] An easel painting of circular form; also a carving in relief within a circular space.

**Tone** (tōʊn), *sb.* Forms: 4 ton, 4– tone; (5 toun, toyn, 5–6 toyne; 6 toone). [Partly a. OF. *ton* (of voice, 13th c. Littré) = Prov. *ton*, Cat. *to*, Sp. *ton*, *tono*, Pg. *tom*, *tono*, It. *tuono*:—L. *ton-um*, acc. of *ton-us*; and partly directly f. L. *tonus* 'stretching, quality of sound, tone, accent, tone in painting', in med.L. esp. as a term of music, a. Gr. τόνος 'stretching, tension, raising of voice, pitch of voice, accent, musical mode or key, exertion of physical or mental energy'; f. strong grade of vbl. ablaut series τεν-, τον-, τα-, in τείν-ειν to stretch. In musical senses, much influenced by med.L. uses of *tonus*, and in more recent uses, largely influenced by Greek.

The early phonology is far from clear, the obscurity being increased by the changing values of the spellings *o*, *oo*, *ou*, *oy*, and their ambiguity at certain periods. The normal course is for *ton* of voice, 13th c. (*tōn*) to become *-one* (*-ōn*) in ME., and diphthongal *-oun*, *-oun* (as in *sound*(*s*), *noun*, *renoun*, *bounty*) in mod.Eng. An example of this appears *c* 1407 in sense 1, where Lydgate rimes *toun*, *sown*. But earlier than this we find the *tone* (pronounced *tōn*) form (more learned or technical formation) direct from L. *tonus*, so well known in mediæval music, which became the prevalent form, and appears *c* 1325 in sense 2 b, riming with *mon* 'noon'. The normal fate of this was to become in 15–16th c. *toon* (= *tōn*); cf. 1570 in sense 1, where Levins rimes *toone* with *boone*, *moone*, *noone*, *soone*, etc. But here again the influence of L. *tonus* appears to have prevailed, so as to make *tone* (*tōn*) the finally accepted form. The sound of *toyn*, *toyne*, in *c* 1460, 1521, is doubtful: *-oy*, *-oi* in Sc. and north. dial. generally mean long *ō*. The Sc. examples of *tone* in sense 2 *c* are also doubtful; they may be precursors of mod.Sc. (tōn, tūn), and more properly belong to Tune, a divergent form of *tone* which has finally been differentiated as a distinct word, q.v. *Tone*, *toon*, and *toun*, might thus be viewed as separate words; but as the two latter are obs., and all the forms go back directly or indirectly to L. *tonus*, they are here treated as one, under the current spelling, but with the quotations separated.]

**Tone,** *pron.* and *a.* Now only *dial.* Forms: *α.* (*north. dial.* and *Sc.*) (3 þat an), 4 þe tan, 4–5 þe tane, 4–6 the tayne, 6 the taine, 4–9 the tane, (9 the taen). *β.* 3–5 þe ton, (4 þe tonn), 4–5 þe toon, þe tone, 4–6 the ton, 4–7 the tone, 5 the toon, (6 the town, 7 the tone). *γ.* (without *the*) 6–7 ton, 6–8 tone, 8 t'on, 9 t'one, (t'ann). [Early ME. *þe tōn*, *þe tōn*, for earlier *þat or þat ōn*, 'the one' (see THAT *dem. adj.* 5); the *t of þat* being attached to *ōn*, *ōn*, when *þe* became the general form of the definite article. Normally used in antithesis to *þe tōþer*, *the tōther*, which had a similar origin: see TOTHER. This usage cannot have arisen until the OE. antithesis of *ōðer*... *ōðer*, as in L. *alter*... *alter*, gave place to *ōn*... *ōðer*, as in Fr. *l'un*... *l'autre*; nor until *þet* (*þet*, *þat*) was usable for masc. and fem. as well as neuter, i.e. between 1200 and 1250: see ONE *numeral* 18, OTHER *a.* B. 1, 2. Used absolutely or pronominally, *the tone* is found in literature down to *c* 1600, and in many dialects to the present day; in Sc. *the tane* is in ordinary use. But as an adj., preceding a sb., esp. before a consonant, it was reduced at an early date to *þe tā þe tō*, still in Sc. *the tae* (see To *a.*); although the full *the tone*... *the tother* was also frequent, until gradually superseded in literary Eng. by *the one*... *the other*, dialectally and colloquially also *tone*... *tother*, later sometimes written *t'one*... *t'other*. This, in the northern Eng. dialects in which the definite article regularly appears as *tē*, *tā*, *t'*, may really stand for *t'one*, *t'other*; but elsewhere, where the article is not *te*, *t'*, it is perhaps rather '*t one*... '*t other*, due to the dropping of *the* from *the tone*... *the tother*. In both *the tone* and *the tother*, *the* is omitted after a possessive pronoun or case, as *dial. his tone* or *to hand*, Sc. *his tae hand* = 'one of his hands'. For full illustration of existing dialect use, see *Eng. Dial. Dict.* s. v. *Tone.*]

The natural mod.Eng. rep. of OE. *tunge* would be *tung*, as in *tung, rung, sung* (and as the word is actually pronounced); but the ME. device of writing *on* for *un* brought in the alternative *tonge* with variants *tounge, toungue*; apt the effort to show that the pronunciation was not (tundʒ) led to the later *tongue*, *tongue*, although it is true that these hardly appeared before final *e* was becoming mute, so that its simple omission would have been equally effective. The spelling *tongue* is thus neither etymological nor phonetic, and is only in a very small degree historical.)

**I.** The bodily member.

**1.** An organ, possessed by man and by most vertebrates, occupying the floor of the mouth, and attached at its base to the hyoid bone; often protrusile and freely movable. In its development in man and the higher mammals, it is tapering, blunt-tipped, muscular, soft and fleshy, important in taking in and swallowing food, also as the principal organ of taste, and in man of articulate speech.

In some mammals, as the ant-eaters, it is attenuated, long, and worm-like; in most birds it is pointed, hard, and horny; in fishes, hard and immovable; in snakes and many lizards, cylindrical, slender, and forked, and an important tactile organ; in some amphibia, it is fixed at the front and free at the hinder end, and (as also in chameleons) used in licking up their prey.

**II.** Carrying capacity, weight, etc., in tons.

**4.** The carrying capacity of a ship expressed in tons of 100 cubic feet (see TON[1] 2).

Originally the number of tun casks of wine which a merchant ship could carry. Afterwards estimated by measurements and calculations which gave rough approximations to the actual cubic content (*Old Measurement*, or O.M.). Now arrived at by measurement of length, and a series of exact measurements of breadth and depth at determinate distances, from which by a mathematical calculation (see Merchant Shipping Acts from 1854 onward, and esp. that of 1894, § 77–82) the cubic content of the space under the tonnage-deck (*Under-deck tonnage*) is obtained. To this we added the contents of all enclosed spaces above this deck, the result being the *Gross tonnage*. The deduction from the latter of the space occupied by the quarters of the crew, and that taken up in a steamer by the engines, boilers, etc., gives the *Register tonnage*, for which vessels are registered, and on which the assessment of dues and charges on shipping is based. The British system of measurement is now adopted in most important countries, but in some places is ignored, and the ship re-measured according to local rules. The *Suez Canal tonnage* includes a small deduction for engine-space, etc., and approximates more closely to the gross tonnage. The expression *Dead-weight tonnage* (or *carrying capacity*) is sometimes applied to the number of tons of 20 cwt. that a ship will carry laden to her load-line. *Displacement tonnage*, the number of tons of water displaced by a ship when thus loaded, used in England in stating the tonnage of men of war since c 1870.

1718 STRYPE *Acc. Rishpool* 170 There is a great difference between a shipwright's and merchant's way of calculating the tonnage of a ship. *Ibid.*, The shipwright's way is to multiply the length of the keel by the middle-breadth, and that product by half the breadth and then they divide the last product by 94, and the quotient is the tonnage. 1748 *Anson's Voy.* III. vii. 354 The duty..paid by all ships, according to their tunnage. 1751 LABELYE *Westm. The termination agrees with that of pr. pples., whence Pott conjectured an original **ed-ont-*, pr. pple. of *ed-* to eat; i.e. 'an eater'. OE. *tōþ* was originally a masculine consonantal stem, with dative sing. *tēþ* (=*-tēþi*), pl. nom. *tēþ* (=**-tēþiz*), gen. *tōþa*, dat. *tōþum* (in early ME. *toþen*). A rare pl. *tōþas* after masc. *-ō* stems also occurs. An umlaut pl. is seen also in OFris. *tēth*, MLG. *tene*, LG. *tāne*, OHG. *zeni*, MHG. *zene*, Ger. *zähne*. In use the plural is much more frequent than the singular, and in some dialects the latter is sometimes assimilated to it as 'a teeth'.

A double plural *teeths* was formerly (and is still *dial.*) used in speaking of a number of persons; e.g. *in spite of their teeths*, pl. of *in spite of his teeth*: see senses 4, d, 5.]

**1.** In plural, the hard processes within the mouth, attached (usually in sockets) in a row to each jaw in most vertebrates except birds (but also in some extinct birds), having points, edges, or grinding surfaces, and serving primarily for biting, tearing, or trituration of solid food, and secondarily as weapons of attack or defence, and for other purposes; in singular, each of these individually.

In mammals usually consisting of dentine coated with cement around the root and with enamel in the exposed part; but in some cases horny, chitinous, or osseous. In some animals, also occurring on other parts, as the tongue or pharynx. Also, applied to similar or analogous structures occurring in the mouth or alimentary canal in some invertebrates.

**Tooting, touting,** *vbl. sb.*3: see TOOT, TOUT *v.*3

**Tooting:** see TOOT *v.*1, 2, TOUTING *vbl. sb.*1

**Tootle** (tūˑtl), *sb.* [f. TOOTLE *v.*]

1. An act or the action of tootling or sounding a horn or similar wind-instrument.

1852 R. S. SURTEES *Sponge's Sp. Tour* xli, Bragg's queer tootle of his horn..now sounded at the low end of the cover. 1889 *Scott. Leader* 6 Dec. 5 The sudden and shrill tootle of a trumpet. 1894 *Daily News* 12 Mar. 2/2 The guard's inspiriting tootle wakes the echoes.

2. Speech or writing of more sound than sense; verbiage, twaddle.

1883 *Cornh. Mag.* May 542 Sometimes..the tootle becomes a middle in a weekly paper, sometimes it assumes the guise of an amusing review. 1888 *Scott. Leader* 8 Mar. 7 The good old order of English prose which used to be called at the English Universities 'tootle', and for which there are other names, older and more recent, but hardly any more expressive.

So **Tootle-te·too·tle, Tootle-tootle,** a piece of continuous tootling.

1855 BROWNING *Up at a Villa* ix, *Bang, whang, whang* goes the drum, *tootle-te-tootle* the fife. 1884 *Pall Mall G.* 24 July 4/2 The musical powers of most of the bands, whom no amount of entreaty could divert even for a moment from their prearranged and wholly meaningless tootle-ti-tootle. 1910 *Sat. Rev.* 10 Sept. 322/1 Footle-footle-footle goes the clarinet with a fragment of a theme; tootle-tootle-tootle echoes the flute.

**Tootle** (tūˑtl), *v.* [freq. f. TOOT *v.*2 + -LE 4.]

1. *intr.* To toot continuously; to produce a succession of modulated notes on a wind-instrument.

1842 S. LOVER *Handy Andy* xviii, The fifer..tootled with some difficulty. 1878 STEVENSON *Inland Voy.* 4 Tootling on the sentimental flute. 1879 SALA *Paris herself again* II. iv. 53 The sable minstrel..begins to tootle most sweetly.

b. Of birds: To make a similar noise.

1820 CLARE *Rural Life* (ed. 3) 207 When tootling robins carol-welcome sing. 1887 — *Sheph. Cal.* 25 To hear the robin's note once more, Who tootles while he pecks his meal. 1890 O. SEMON *In Cap & Bells* (1900) 21 The lark is tootling in the sky.

c. *fig.* To write twaddle or mere verbiage.

1883 [see *tootling* below]. 1894 *Daily News* 28 Feb. 5/2 Mr. Skeat's 'Life of Chaucer' is entirely businesslike. He does not 'tootle' over what Chaucer may have done, and seen, and said.

Hence **Toot·ling** *vbl. sb.* and *ppl. a.*; also **Toot·ler,** a writer of 'tootle', verbiage, or twaddle.

1821 CLARE *Vill. Minstr.* I. 30 He heard the tootling robin sound her lend. *Ibid.* 36 The tuteling fife, and hoarse rap-tapping drum. 1879 JEFFERIES *Wild Life in S. C.* 105 The tootling of pan-pipes in front of the shows. 1883 *Cornh. Mag.* May 542 The sort of scribblers..whom I am wont to call in my own private dialect the tootlers, that is to say the good folk who write a tootle about nothing in particular. *Ibid.* 543 The consumer who takes a delight in the perusal of tootling.

So **Tootle-too** *v.*, **Tootle-tootle** *v.* = TOOTLE *v.* 1.

1857 HUGHES *Tom Brown* I. v, Here's Rugby,..said the old guard, putting his horn out of its case, and tootle-tootling away. 1892 *Pall Mall G.* 16 Dec. 3/1 The drumming and the tootle-tooting, even the skirling of the Hallelujah maidens.

**Tootman:** see under TOOT-NET.

**Tootnague:** see TUTENAG.

**Toot-net** (tūˑt,net). *Sc. local.* [f. TOOT *v.*1 + NET.] 'A large fishing net anchored' (Jam.), which is watched in order to be drawn in when the fish enter it. More fully *toot and haul net.*

1805 *Case Ho. Lords, Gray of Carse* (Jam.), The fishing-tackle..sometimes consisted of a common moveable net or siene; sometimes of a toot-net, much larger and stronger than the former, extending to an indefinite length from the beach into the water, and secured at its extremity by an anchor. 1840 LEIGHTON *Hist. Fife* II. 6 The mode of fishing is now confined..to what is called the toot-net. 1898 *Glasgow Herald* 19 May 4 To fish in..the river and estuary of the Tay for salmon kind with toot and haul nets. 1900 *Law Rep., App. Cas.* 410 The First Division..declared fishing with the nets of the description of toot and haul..an illegal method.

So **Toot·man, toot·sman,** one who watches a toot-net.

1805 *Case Ho. Lords, Gray of Carse* (E.D.D.), A man stands in a coble, or small fishing-boat; and when he sees the fish enter the net, calls the fishers to haul it. He is designed the Tootsman. 1840 LEIGHTON *Hist. Fife* II. 82 The toot-man is seated to watch the net.

**Too-too** (tūˑtūˑ), *v.* [Echoic: usually depreciatory.] *intr.* To make an instrumental or vocal sound resembling these syllables. Hence **Too-too·ing** *vbl. sb.*; so also **Too-too** *adv.* and *sb.*, **Too-too·er.**

1872 H. J. SMITH *Rev. Addr., The Theatre* 25 Tang goes the harpsichord, too-too the flute. 1888 MOIR *Mansie Wauch* xi. [*Note.* The meaning of *top* in the OE. quot. is only inferential, as the OE. *Apollonius* here diverges from the Latin original, which contains no such terms as *turbo, trochus* or other word meaning 'top'; but it is difficult to see what else the OE. word could mean. In *c* 1325 the sense is clear. On the continent, the name of the toy in Holland generally is now *tol*; but *top* is used in East and West Flanders, Antwerp, and parts of Brabant; also in Friesland, Groningen, and Drente, in the North Netherlands; but this has not been found earlier than 1500. In Brussels, Mechlin, South Brabant generally, and Limburg, the form used is *dop. Dop, doppe,* was also the MDu. form, occurring from 13th c. and was the normal LG. equivalent o. OHG. *topfo, topfo,* MHG. *topfe, topf,* Ger. dial. *topf* (= Ger. *kreisel*) in this sense. Of this comparatively late substitution of *top* for *dop* in Flemish, etc., no explanation appears, and it does not help to account for the use of *top* in English before 1500 or even in 1325. The most that could be suggested would be that the word meaning *turbo* or *trochus* has in both cases run together in form with that meaning *apex* (Top *sb.*[1]). On the other hand, the use in 1325 of an Anglo-French *teupe* (*toup*) in this sense seems to form a link with F. *toupie* (also †*tupie*) and its kindred words, OF. *topet* or *toupet*[2], obs. F. *toupin,* and the derivative vbs. OF. *topier* or *toupier, topiner* or *toupiner,* and *toupiller.* But the etymology of *toupie* and its family is beset by as many difficulties as that of *top*; it does not answer in form to either OHG. *topfo* or MLG. *doppe.*]

[*Note.* Generally held to be a. F. *top, tope, tôpe*, according to Littré ellipt. for *je tope*, from *toper, tôper, tauper*, 'to accept a stake or wager', perhaps a word of dice-play. cf. Littré s.v. L'un des joueurs ayant dit : mâsse dix pistoles, l'autre a dit, tôpe); hence, to accept an offer or proposal; = It. *toppa* 'done!', a word said to signify acceptance of a bet, *toppare* 'to say "done" when another offers to lay a wager' orig. to strike against, 'give a counter-shock' (Florio), Sp. *topar* to meet, to run or strike against. Its use in drinking is cited in II. 1659 (see quot. below), and in F. in 1671 (see Littré). The Fr. *tope* has passed into Du. *top*, Gerr. *topp*, Sw. *topp*, in sense 'done!', 'agreed', and for the acceptance of a pledge in drinking. Hence some would derive TOPE.[2] to drink deeply.
1659 TORRIANO *Ital. Dict.*, *Toppa*, a word among Dicers, as much to say, 'I hold it, done, throw', or 'I see the By'; also by good fellows, when they are drinking : 'I'll pledge you'.

Hence **To·p-hea·viness**; **To·p-hea·vyish** *a.*

1823 G. J. Cayley *Lax Aforijas* II. 204 A noble top-heavyish Gothic tower. 1869 Sir E. J. Reed *Iron-Clad Ships* vii. 137 To the unprofessional eye there does appear to be a 'top-heaviness' in armoured ships. 1889 Welch *Tract Rd. Naval Archit.* iii. 63 The mistaken view..that 'top-heaviness' was the cause of the excessive rolling.

**Tophet** (tōu·fĕt). Also 4 tofeth, 4–9 topheth. [a. Heb. תֹּפֶת *topheth* pr. name, of uncertain etymol.

For conjectures, see references in *Oxford Heb. & Eng. Lex.* s. v., One of the most ancient sought to connect it with Toph[2], or its vb.: see quots. 1388, 1749, 1865.]

1. *orig.* Proper name of a place near Gehenna or the Valley of the Son or Children of Hinnom, south of Jerusalem, where, according to Jer. xix. 4, etc., the Jews made human sacrifices to strange gods. Later it was used as a place for the deposit of refuse, and became symbolic of the torments of hell.

1382 Wyclif *2 Kings* xxiii. 10 Forsothe he defoulide Topheth, that is in the valeye of the sone of Ennon, that no man schuld sacryn his sone or his doughtre thorȝ fyr to Moloch [1388 has *marg. note*..Tophet signifieth tympan.. for the noyse of this idol, made noye with timpans, lest fadres and modris schulden here the cry of her sones, dyynge bi fier in the hondis of the idol]. 1535 Coverdale *Ibid.*, He suspended Tophet also in the valley of the children of Emron [1611 Bible *Ibid.*, He defiled Tophet]. 1667 Milton *P. L.* i. 404 [Moloch] made his Grove The pleasant valley of Hinnom, Tophet thence And black Gehenna call'd, the Type of Hell. 1749 Stackhouse *Hist. Bible* vi. iv. 911 *note*, It is the general Opinion of the Jews, that the Word *Tophet* comes from *Toseph*, which, in their Language, signifies a Drum. 1865 Grosart *Lambs all Safe* 117 (tr. Pintus 1582) That the parents of the child might not hear its wailing, the priests beat drums, from which cause the place was called Tophet, or a drum.

2. The place of punishment for the wicked after death; the place of eternal fire; hell, Gehenna.

1388 Wyclif *Isa.* xxx. 33 For whi Tophet [1382 Tofeth], *that is, helle*, deep and alargid, is maad redi of the kyng tou ȝisiȝtful. 1611 Bible *Ibid.*, For Tophet [1885 *R. V.*, a Topheth] is ordained of olde..the breath of the Lord, like a streame of brimstone doeth kindle it. 1678 Bunyan *Pilgr.* i. 2, I fear that this burden..will sink me lower then the Grave; and I shall fall into Tophet. *a* 1708 Beveridge *Priv. Th.* i. (1816) 95, I never did see..the flaming tophet that is below. 1825 Scott *Talism.* xviii, Whose ashes, when this earthly fuel is burnt out, must yet be flung into Tophet.

3. *fig.* A place, state, condition, or company likened to hell. a. A 'hell upon earth'.

1628 J. Taylor (Water P.) *Penniless Pilgr.* E1b, Yet all I saw was pleasure mixt with profit, which prou'd it to be no tormenting Tophet. 1849 Macaulay *Hist. Eng.* iv. I. 498 The chief of this Tophet [Claverhouse], a soldier of distinguished courage and professional skill, but rapacious and profane. 1883 Miss Braddon *Gold. Calf* xxv, If she could..lead her husband's footsteps out of this Tophet into which he had sunk himself.

b. A place or state of wild chaos and warring elements; a roaring furnace; a raging whirlpool, a maelstrom.

1837 Hawthorne *Twice-told T.* (1851) I. x. 172 Converted quite to steam, in the miniature tophet, which you mistake for a stomach. 1856 Mrs. Browning *Aur. Leigh* i. 418 Shuffling off The hearer's soul through hurricanes of notes To a noisy Tophet. 1912 *Daily News* 4 July 2 The officer barked out the short order, 'Load twelve-inch gun'.. Instantly tophet was let loose in the turret.

4. *Comb.*, as *tophet-black*, *-red* adjs.

1837 Carlyle *Fr. Rev.* III. v. iv, Simultaneously with this Tophet-black aspect, there unfolds itself another aspect, which one may call a Tophet-red aspect, the Destruction of the Catholic Religion; and indeed, for the time being, of Religion itself.

Hence (*nonce-wds.*) **To·phetic**, **-ical** *adjs.*, of, pertaining to, or of the nature of Tophet; **To·phetize** *v.*, *trans.* to make a Tophet or hell of; **To·phetism**, hellishness.

1684 N. S. tr. *Crit. Eng. Edit. Bible* xxv. 226 All the stratagems of Popery, all the tophitical Tyranny of the School-men. 1698 C. Mather *Angel. Chr.* vii. Dundee* i. 20 It is brutality rendered dangerous and Tophetical by excessive bumptiousness. [Cf. quot. 1849 in 3.] *Ibid.* 38 The idealized Tophetism of a trooper's 'damning'.

**Tophic** (tōu·fik), *a.* [f. Toph-us + -ic.] Of the nature of toph or tophus; tophaceous.

1789 J. Williams *Min. Kingd.* II. 383 There are great quantities of the concreted substance called *tufa* in many parts of Scotland..The process of nature, in the formation of this tophic substance, is to be explained upon the same principles as the stallactites.

†**Tophoʼse**, *a.* [f. as next: see -ose.] = next.

1752 J. Hill *Hist. Anim.* 581 The Capra, with a tophose bunch on the head.

**To·phous**, *a. Obs.* [ad. rare L. *tōph-*, *tōfōsus*, f. Tophus, *tōfus*: see -ous.] Of the nature of a stony or calcareous concretion: a. in the body, b. in deposits from springs, etc. (cf. next).

1634 T. Johnson *Parey's Chirurg.* xix. iii. (1678) 432 You shall find them [pustules] stuffed with a certain plaister-like and tophous matter. 1692 Ray *Disc.* 110 Now these Teeth being burnt, pass presently into a Coal, but the tophous substance adhering to them, doth not so. 1699 Misaurus *Hon. Waters* II. 141 A..petrifying incrusting or tophous water, which rises in several large springs.

**Tophus** (tōu·fŭs). Also 6–7 tofus, 7 tophis, -as. *Pl.* ‖**toph**i; also 7 tophy, tophoes, tophuses, tofusses. [a. L. *tōphus*, better *tōfus*, a general name for loose porous stones of various kinds, whence It. *tufo* (also *tofo* in Florio, 'a kind of soft, crumbling, or mouldring stone, to build withall'), Fr. *tuf* (16th c. in Hatz.-Darm.), 'generic name of porous stones, produced in the form of sediment or incrustation, as calcareous, siliceous, volcanic *tuf*' (Littré): see also Tuff, Tufa.]

1. A soft porous stone, arenaceous, calcareous, or volcanic; *esp.* a stony substance deposited by calcareous springs.

1555 Eden *Decades* 19 The stone cauled *Tofus* whiche is soone resolued into sande. 1615 G. Sandys *Trav.* 161 (tr. Juvenal) How much more venerable had it beene, If grasse had cloth'd the circling banks in greene, Nor marble had the natiue tophis marr'd. *Ibid.* 272 The artificiall rocks, shells, mosse and tophus, seem to excell that which they imitate. 1621 — *Ovid's Met.* iii. (1632) 84 A natiue Arch she drew, With Pumice and light Tofusses, that grew [tr. 1626 nam pumice vivo, Et levibus tophis nativum duxerat arcum]. 1692 Ray *Disc.* 111 Among Tofusses and Stones in those dry places. 1696 *Phil. Trans.* XIX. 194 He produces one Echinus, bruised in the Tophus in which it lay. 1789 Pilkington *View Derby*, I. vii. 316, I have seen a stag's head..which was found in the tophus at Alport. 1842 Brande *Dict. Sc.*, etc., *Tophus*, the term has been applied to porous deposits of calcareous matter from water.

2. *Path.* A concretion which forms on the surface of the joints, the teeth, the pinna of the ear, etc. in gout; a gouty deposit; also gravel, or a stone or calculus, formed within the body.

1607 Topsell *Fourf. Beasts* (1658) 65 In the second venter of a cow there is a round black tophus found, being of no weight. 1612 Woodall *Surg. Mate* Wks. (1653) 72 *Atromia-cum*..dissolveth Tophoes or hard stones grown in the flesh. 1663 Boyle *Usef. Exp. Nat. Philos.* ii. iii. 77 With a very few Doses..the Merchant was quickly free'd, not onely from his Pains, but from his Gouty Tophy. 1698 Tyson in *Phil. Trans.* XX. 132 These Hairy Tophi are frequently to be met with in the Stomachs of Bruits. 1860 Mayne *Expos. Lex.*, *Tophus*..*ibid.* A name for the matter concreted in the joints of the gouty; also the calculous matter concreted in the kidneys and urinary bladder; also the tartar on the teeth. *Surg.* Term for a swelling particularly affecting a bone, or the periosteum: a toph. 1866 A. Flint *Princ. Med.* (1880) 1103 These gouty concretions are called toph or chalk-stones.

3. *Comb.* tophus-stone = Travertin.

1830 Lyell *Princ. Geol.* I. 211 Pallas..enumerates a great many hot springs, which have deposited monticules of traverthi precisely analogous in composition and structure to those of the baths of San Filippo, and other localities in Italy. ..Speaking of the tophus-stone, as he terms these limestones, he often observes that it is snow-white.

‖ **Topī, topee** (tōpī·). *East Ind.* [a. Hindī *topī* hat; prob. the word mentioned in the Vocab. of *Linguagem de Calicut* in the *Roteiro de Vasco da Gama* 1497, 'barrete: *tupy*', related to Hindī '*top* helmet or hat' (Yule). (But some think the latter is an adaptation of Pg. *topo* top.)] Originally applied by Indian natives to the European hat; now specialized in Anglo-Indian, as a name for the *sola topī*, sola hat or helmet: see Sola *sb.*

1835 *Court Mag.* VI. 207/2 The white *sombrero* solah topee, was supplanted by a raking cocked hat. 1845- Sola topee [see SOLA *sb.* (*b*)]. 1849 R. B. EASTWICK *Dry Leaves* 2 And there is need of many a fold of twisted muslin round the white topi to keep off his [the sun's] importunacy. 1872 'ALIPH CHEEM' *Lays of Ind* (1876) 41 The boat came back in a little space, With Grant and the topee blue. 1889 *Blackw. Mag.* Aug. 245 You wear a pith topee. 1904 *Daily Record & Mail* 1 Jan. 4 The white topee, green-lined, is a favourite hat.

*Comb.* 1880 A. M. RUTHQUIST in *Life* xi. (1893) 201 A rather lengthy lesson in topee-making was given.

Hence ‖ **Topī-, topee-wallah** (topī,wă·lä), also **-wala** [a. Hindī *topīwālā*, one who wears a hat, f. *topī* + WALLAH fellow], the Indian name for a European, because he wears a hat.

The term is used 'by the natives with a shade of disparagement', while 'all persons claiming European blood' take pride 'in wearing a hat' (Yule & Burnell, *topīwālā*). R. Drummond says that in his time (before 1808), *Topeewala* and *Faggeywala* were used in Guzerat and the Mahratta country for 'European' and 'Native'. So 'the author of the Persian *Life of Hyder Naik* calls Europeans *Kalāh-posh* hat-wearers' (*Ibid.* s. v.).

1826 HOCKLEY *Pandurang Hari* vi. I. 88 It was now evident we should have to encounter the *Topee Wallas*. 1834 A. **Topic** (tŏ·pik), *a.* and *sb.* Also 6 **topicke**, (**toopick**), **7 topike, -ique, -yo, 7–8 -ick.** [As adj., ad. Gr. *τοπικ-ός* of or pertaining to *τόπ-ος* a place (see -IC); local, or concerning *τόποι* commonplaces. As sb., ad. L. *topica*, a. Gr. *τοπικά* adj. neuter pl., in *τὰ τοπικά*, title of a work of Aristotle, lit. matters concerning *τόποι* commonplaces.

The use of *τόπος* 'place' for a class of considerations which would serve as a 'place' in which a rhetorician might look for suggestions in treating his theme, goes back to Isocrates. By Aristotle *τόπος* was especially appropriated to classes of considerations of a general character, common to many kinds of subjects, the use of which was open to any one dealing with his subject as a rhetorician or dialectician, not with special knowledge with a view to scientific demonstration. Such were those fully described in Aristotle's *Topics*, *dict commonness*, COMMONPLACES. Aristotle's treatise on *probable* (as distinguished from *demonstrative*) reasoning, which started from such general considerations and dispensed with special knowledge, was referred to as *τὰ τοπικά*; and such general considerations and arguments based thereon as were treated of in that work were called *topic axioms, rules*, or *maxims*, *topic arguments*, or simply *topics*; sometimes with less, sometimes with more emphasis on the general character of such arguments. (C. C. J. Webb.)]

*A. adj.*

**I. †1.** Pertaining to or of the nature of a 'commonplace' (COMMONPLACE A. 1) or general maxim. *Rule topic*, a general rule, which may fail to apply in a particular case, so that its application is only probable and not certain: see above. *Obs.*

**Topsy-turvy** (tɒ·psi, tɒ·pi-vi), *adv.* (*a.*, *sb.*, and *v.*) Forms: *a.* 6 topsy tervy, tyrvy, turuie, turvy; 6- topsy-turvy, (8-9 -turvey). Also 6 topsituruie, -turuy, 7 -turvy, -turvie, topsi-turvi, top-si-turvy; 6 topsie turuie, -vie, -vey, 6-7 -turuy, 7 -turvie, -turvy; ? topse-turvie. See also the inverted Turvy-topsy. (Now almost always hyphened; in early use more usually two words; sometimes (in every century) as one word.) *β-γ*: see below. [A kind of alliterative or assonant

combination, known in print from 1528, but prob. in popular use from an earlier period. The early spelling was *topsy-tervy* or *-tirvy*, from *c* 1540 written *-turvy*, *-turvie*. (Cf. the pronunciation of *nerve*, *curve*.) As to the actual components no external evidence has been found, and numerous conjectures and suggestions (many of them absurd and impossible) have been offered. Some of the more plausible of these, taking *topsy* as representing *top-set* or *top-side*, have been introduced (by those who favoured them) into the spelling; but amid all these aberrations, the typical form, with mere spelling variants, as *topsy*, *topsie*, *topsi-*, and *tervy*, *tirvy*, *turvy*, *turvie*, has remained practically constant. It seems certain that the first element contains *top* (or *tops*) and probable that the second is related to *terve* or TIRVE *v.* to turn, turn over, overturn; but the *-sy* of the first and *-y* of the second still want explanation: the former is viewed by some as representing an earlier *so*, as in *up-so-down*, now *upside-down*, *so* becoming *sy* under the influence of *turvy*, the *y* of which is apparently as in *hilty-missy*, *hurly-burly*, *arsy-versy*. A suggestion that *turvy* was connected with *turf* or *turve*, and referred to the laying of cut turfs or turves face downward, to keep them fresh, is now discarded, as is the earlier notion that *turvy* might have been altered from *t'other way*.

(There is a certain parallelism between the series *up-so-down*, later *upset-down*, *upside-down*, and *'tot-so-tervy*, *topsy-tervy*, *topset-tervy*, *topside-tervy*; but the former has not become *upsy-down*, nor has any trace of **top-so-tervy* been yet found, so that the analogy is incomplete.])

With the top where the bottom should be; in or into an inverted position; upside down, bottom upwards; also less definitely, In or into the position of being toppled over, overturned, overthrown, or upset; right over. **Tor** (tɔ̄r), *sb.* Forms: 1, 6– torr, 4–7 torre, 4– tor. [Occurs as an element in topographical names in early West Saxon charters; also, as a local term for a topographical feature from OE. onward. Generally held to be Celtic; but, though frequent in place-names in Cornwall, Devon, etc., not recorded as a 'common noun' in Cornish or Breton. In Welsh the nearest word is app. *tŵr* (= tăr), OW. *twrr* 'heap, pile' (rare in place-names, but cf. *Mynydd Twrr*, old name of Holyhead Mountain, Rhŷs). Prob. cognate with Gaelic *torr* 'hill of an abrupt or conical form, lofty hill, eminence, mound, grave, heap of ruins' (Macleod and Dewar), primarily 'heap, pile', cf. *torr* vb. 'to heap up, pile up, bury', Ir. *torraim* 'I heap up', and the deriv. Gael. *torran* 'little hill, knoll, hillock', Ir. *torrán* 'heap, pile, hillock'. Cf. also quot. 1905.]

**1.** A high rock; a pile of rocks, *gen.* on the top of a hill; a rocky peak; a hill. In proper names of eminences or rocks in Cornwall, Devon, Peak of Derbyshire; also sporadically in some other counties, e. g. *Glastonbury Tor*, in Somerset.

**Tornado** (tɔrnēˈdō). Forms: (6–7 ternado), 7– tornado; also 7–8 turnado, (7 tornathe, tornada, 8 tournado). See also Tornade. [In Hakluyt and his contemporaries, *ternado*; from Purchas 1625 onward, *turnado, tournado, tornado.* In none of these forms does the word exist in Spanish or Portuguese. But the early sense makes it probable that *ternado* was a bad adaptation (perh. orig. a blundered spelling) of Sp. *tronada* 'thunderstorm' (f. *tronar* to thunder), and that *tornado* was an attempt to improve it by treating it as a derivative of Sp. *tornar* to turn, return; cf. *tornado* pple., returned. It is notable that this spelling is identified with explanations in which, not the thunder, but the turning, shifting, or whirling winds are the main feature. This is emphasized in the variants *turnado, tournado.* Mod.F. *tornado* is from Eng. (not Portuguese, as in Littré).]
